DATABASE
SQL Server • MongoDB
Firebase • Convex

METHODOLOGY
SAFe (Scaled Agile Framework)

AI & AUTOMATION
LLMs • LangChain • LangGraph
LangServe • MCP Servers
ReAct Agents • Vector DBs
Eembeddings • RAG Pipelines

OTHERS
Git • Docker

RECOGNITION

WMT Excellence Award-GRID
FMR Impact Award–Fastest Delivery
FMR Impact Award–Tech Culture
Convex Champion

EXPERIENCE

WALMART GLOBAL TECH INDIA | Senior Software Engineer
July 2024 - Present | Bengaluru

- Revamped the mobile verification process for Walmart EA (Canada & Mexico) by creating a reusable, standardized framework, resulting in a smoother and more cohesive user experience.
- Achieved a remarkable leap in Operational Excellence, driving metrics from 12% to 98% through targeted system improvements and process optimizations.
- Led the integration of Extended Assortment and Grocery platforms under the Merged Hallway initiative, enabling a seamless and unified user journey.

FIDELITY INVESTMENTS | Lead Software Engineer
August 2019 - July 2024 | Chennai

- Pioneered a 90% reduction in SDLC Time-to-Market by creating and implementing generic solutions for clients such as Wells Fargo and PNC.
- Led over 10 innovative initiatives, contributing valuable additions to projects.
- Orchestrated solution design and architecture, providing comprehensive technical guidance for seamless project execution.
- Developed a smart chatbots leveraging Amazon LEX, Kendra, and Lambda.
- Delivered impactful presentations on various tech topics to audiences of 100+ members.

TCS | Software Developer
August 2016 – August 2019 | Chennai

- Developed 12 applications using Angular and .NET Core APIs.
- Engineered a MEAN Stack tracking tool, attracting 1000+ internal TCS employees and significantly improving efficiency.
- Assumed the role of Scrum Master, representing the team in international forums.

PROJECTS

RUTUGO | Smart AI Travel Planner Assistant
NextJS | TailwinCSS | OpenAI | Convex | Clerk | Razorpay
AI travel companion designed to simplify the process of planning the travel includes tailored itinerary, packing checklist, top places to visit and much more. More than 8000 Users and 10000+ Plans Created so far.

GRID | AI-Driven Bug Triage Super Agent
LangGraph | Python | Sonnet4 | Vector DB | Playwright | MCP Servers
Developed multi-agent orchestrated SUPER agent integrating logs, service data, code analysis, and reproduction workflows for automated bug triage and resolution, reducing manual debugging by 80% and on-call analysis time to under 5 minutes. Built an MCP server for OpenObserve enabling advanced log correlation and time-series analysis.

QUICKMEDI.AI | Reliable AI Health Assistant
NextJS | Convex | Supabase | OpenAI Embeddings
Comprehensive platform to address medical inquiries with accurate answers and video insights from certified experts. Facilitated appointment scheduling and provided information on nearby medical camps.
